EDUCATION

Bachelor of Computer Science

Concordia University

Montreal, QC

Sept 2022 – Aug 2026

- **Relevant Coursework:** Artificial Intelligence, Machine Learning, Data Structures & Algorithms, Databases & SQL, Operating Systems, Software Engineering, Web-Based Enterprise App Design, Mathematics for Computer Science

TECHNICAL SKILLS

Languages: Python, Java, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Frameworks & Libraries: LangGraph, LangChain, FastAPI, Next.js, React.js, Node.js, Express.js, PyTorch, Three.js, React Three Fiber

Databases, Cloud & DevOps: PostgreSQL, MongoDB, Redis, ChromaDB, Docker, Google Cloud Platform (GCP), Git, Linux/Bash, CI/CD

Core Methodologies: Multi-Agent Orchestration, Hybrid RAG (Chroma + BM25, RRF), System Design, RESTful APIs, Microservices

TECHNICAL PROJECTS

FinAgent – Enterprise SEC Multi-Agent Intelligence System | [GitHub](#) | [Live App](#)

July 2026 – Present

Python, LangGraph, Hybrid RAG (ChromaDB + BM25), Reciprocal Rank Fusion, FastAPI, Streamlit, Ragas Benchmark

- Engineered an autonomous multi-agent financial auditing platform using **LangGraph** with stateful graph routing across Supervisor, Quant Analyst, Risk Auditor, and Grounding Verifier agents to analyze Form 10-K SEC filings.
- Built a **Hybrid RAG pipeline** fusing **ChromaDB dense vectors** and **BM25 keyword search** via **Reciprocal Rank Fusion (RRF)**, eliminating LLM hallucinations with 100% factual citation grounding.
- Developed a deterministic Python math sandbox computing verified financial formulas (YoY growth, operating margins, leverage ratios) with multi-layer enterprise guardrails (prompt injection defense, PII scrubbing, Pydantic validation).

ConU Planner – Cloud-First Academic Planning Engine | [GitHub](#) | [Live App](#)

Oct 2025 – Present

Next.js, React, FastAPI, PostgreSQL, Chrome Extensions (MV3), Puppeteer, Clerk Auth, Docker

- Developed a cloud-first academic planning platform with server-side state persistence serving **5,000+ active students** to sequence degree requirements, track academic progress, and forecast GPAs in a unified interface.
- Designed a **Topological Sorting Degree Pathfinder** analyzing prerequisite DAGs across **7,900+ courses** to generate mathematically optimal graduation schedules for CS and 6+ Engineering disciplines.
- Engineered a Chrome MV3 Extension and client-side PDF.js parser extracting PeopleSoft transcripts in under 60 seconds, complemented by Puppeteer-based automated scrapers with dynamic rate-limiting to monitor seat availability.

Aacharya – 3D Celestial Astrophysics Engine | [GitHub](#) | [Live App](#)

Aug 2024 – Present

Next.js, Three.js, React Three Fiber (R3F), WebGL, Canvas API, Framer Motion

- Constructed a client-side astrophysics engine computing precise sidereal planetary longitudes and coordinate projections using Local Sidereal Time (LST) and high-accuracy trigonometric coordinate models.
- Engineered an interactive 3D Solar System using **React Three Fiber** and WebGL, implementing GPU-accelerated starfields with real-time mouse repulsion physics.
- Programmed a procedural SVG rendering engine mapping 12 celestial houses dynamically at runtime, coupled with a 36-point matchmaking algorithm executing relationship compatibility analytics in real time.

WORK EXPERIENCE

Data & Customer Experience Consultant

Vancouver, BC (Remote)

Rippen Labs (Level UP) – Client: Moms Against Racism

May 2026 – June 2026

- Analyzed multi-channel user engagement, subscriber retention, and cancellation datasets to identify onboarding friction points.
- Delivered an actionable Customer Experience (CX) optimization brief and data-backed onboarding roadmap for a 500+ member non-profit community platform to improve member conversion and active retention.

Market Research Associate

Montreal, QC

Access Research Inc.

Jan 2023 – Apr 2023

- Conducted structured enterprise research interviews across **500+ corporate clients**, achieving a **95% data entry accuracy rate** and ensuring strict adherence to compliance and quality assurance protocols.
- Resolved high-friction customer interactions using professional active listening and de-escalation strategies.

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

Vice President of Events

Montreal, QC

South Asian Student Association (Concordia University)

Sept 2024 – Aug 2026

- Planned, budgeted, and executed large-scale cultural and networking events for **500+ attendees**, overseeing cross-functional student teams and sponsor outreach.

Community Kitchen Volunteer

Montreal, QC

People's Potato (Concordia University)

Sept 2023 – Jan 2026

- Collaborated in a high-volume team to prepare and distribute free, healthy meals to **300+ university students daily**.
